

MINAX

Minax is a quick fastening system for combining two materials, particularly valued in the construction of boats (sailcloth) or motorhomes (awnings). It is similar to the LOXX and Tenax systems, but the fact that it is made of plastic has the great advantage that the Minax fastener does not rust.

- ✓ Easy to assemble
- ✓ Made of plastic, prevents scratches on paintwork
- ✓ Economical and weatherproof closure system

Unique to Minax

Perfect for use in (salt) water environments because Minax does not rust!
